Computer Physics Reports

Contents to Volume 12

J. Bauche and C. Bauche-Arnoult, Statistical properties of atomic spectra 12 (1990) 1
C. Hoheisel, Memory functions and the calculation of dynamical properties of atomic liquids 12 (1990) 29
I.I. Sheykhet and B.Ya. Simkin, Monte Carlo method in the theory of solutions . 12 (1990) 67
W. Kerner, Algorithms and software for linear and nonlinear MHD simulations 12 (1990) 135
A.W. Hood, Structure and stability of the solar corona 12 (1990) 177
J.V. Hollweg, Heating of the solar corona 12 (1990) 205
N.O. Weiss, Solar and stellar convection zones 12 (1990) 233
T. Sakurai, Magnetohydrodynamic solar/stellar wind models 12 (1990) 247
M. Kuperus, Magnetohydrodynamics of accretion disks 12 (1990) 275
Gao Junming, Cui Zhang and Hao Bailin, The knowledge-based system GRAPE and its application to Landau theory analysis for magnetic space groups 12 (1990) 289
G.D. Billing, The dynamics of molecule–surface interaction 12 (1990) 383
